Sex: Female

Date Of Assignment: 2024-01-05T18:30:00.000Z

Preferred Language1: English

Preferred Language2: Tamil

Preferred Language3: Marathi

Supervisor:
Summary: Anya Shankar, a 3-year-old from Mumbai, has a language processing disorder with delayed speech development. She struggles with communication challenges, including difficulty with high-frequency sounds and multisyllabic words, but shows strengths in letter recognition. Her recommended treatment involves twice-weekly speech therapy to improve articulation and support her bilingual language development.
